

## *Mesh Style Railing*

## **GRIDGUARD® RAIL**

Staging Concepts' Gridguard® mesh infill railing system is available in a variety of wire mesh panels, or other infill materials to achieve the desired look for your project. Flexible mounting methods allow for use in nearly any location. A variety of materials, finishes, colors, and infill attachment styles are available for use in the frame to meet your facility requirements. We can design and manufacture custom railing or assist in determining which of our standard models works best for your project.
